AANJI-AKI: THE CHANGING EARTH & INDIGENOUS ADAPTATION

Indigenous peoples have adapted to changes on Shkakimikwe (*Mother Earth*) since time immemorial. We value repatriation as core to the revitalization of our traditional education systems. These traditions will help us bring our world back into balance as we restore healthy relations, especially for those who are most vulnerable, including women, children, and two-spirit. We will adapt to climate change as we continue to find our identity as rooted in Shkakimikwe.
